

DIRECTIONS FOR PRINTING SIERRA FRONT GUIDE

This document has been saved as a PDF file to allow easy access, the document is double sided and designed to be folded into a 5 ½ by 8 inch booklet. For best results, print it on a color printer that allows double sided printing. When you set the printer to print on both sides, there should also be a choice to “Flip on short side” or “Flip on long side”, choose “Flip on short side”.

To allow the cover to be printed on heavier paper or on colored paper, the cover is a separate file named “Sierra Front 2015 Cover Page.PDF”. Open and print double sided; flip on short side on heavier colored paper to make a cover for the booklet.

Then open and print the file named “Sierra Front Radio Guide 2015.PDF”, using the same instructions as above. If it printed correctly, you should be able to fold it into a booklet with pages 14 and 15 being the center pages, fold the cover page over it and staple at the crease. You can also cut the printed pages in half and hole punch it to fit into the Sierra Front Resource guide that came out a few years ago.
